CAREER OBJECTIVE

A diligent, reliable, and highly motivated professional with a strong foundation and comprehensive expertise in medical imaging technologies, I am deeply passionate about advancing academic research within this field while contributing meaningfully to the broader healthcare landscape. Endowed with exceptional communication and public relations skills, I have engaged with diverse populations at both national and international levels and have actively participated in various organizations committed to global development, humanitarian progress, and cross-cultural collaboration. My professional experience encompasses hands-on management of all major imaging modalities across the Radiology Departments of B.P. Koirala Institute of Health Sciences, Surkhet Province Hospital, Hetauda Hospital, and Bir Hospital (NAMS), as well as DR Mammography operations at the All Medical Doctors Association of Asia (AMDA), Kathmandu equipping me with a well-rounded and practical command of diagnostic imaging in diverse clinical settings. Beyond clinical practice, I have demonstrated competence in academic coordination and institutional management through my oversight of the PCL Radiography Programme. My commitment to humanity extends well beyond the professional realm. At 30 years of age, I have donated blood on 37 occasions; donated my hair in solidarity with cancer patients; and actively provide care to vulnerable street animals. I have a long-term vision of serving on a distinguished international platform such as the United Nations representing my nationality, culture, and language with integrity and dedication. I remain guided by my unwavering conviction that "The development of culture is intrinsically tied to the development of language."
