

Postdoctoral Position in NYC

Translational Multi-scale Imaging of the Aging Brain

Applications are invited for a postdoctoral position at the Center for Biomedical Imaging (CBI) at New York University (NYU) Grossman School of Medicine. The successful candidate will join a dedicated, multidisciplinary team of collaborative researchers working on a two-year, NIH-supported project to investigate network architecture across spatial and temporal scales of the aging brain in a nonhuman primate model.

Qualifications

PhD in Biological, Biomedical, Computer Sciences, or related field is required. Candidates must be engaged, well organized, and motivated to assemble and apply their strong analysis skills across a variety of multimodal imaging datasets. Candidates must have experience with data analysis software and tools (e.g., R, python, Matlab, or others). Statistical modeling experience and interest in data visualization are a big plus.

Additional Information

The position is available from Fall 2024. We are located at CBI in midtown Manhattan, New York City, within the NYU Department of Radiology. NYU Langone offers a competitive salary and benefits package. Subsidized housing within walking distance of NYU Langone's campus may be offered, depending on availability. We welcome both domestic and international applicants.

We are committed to diversity and inclusion in all aspects of recruiting and employment. All qualified individuals are encouraged to apply and will receive consideration without regard to race, color, gender, gender identity or expression, sexual orientation, national origin, age, religion, creed, or disability.

To Apply

Email your CV, a brief introduction, and contact information of at least two references in PDF format to Erika Raven, PhD, at Erika.Raven@nyulangone.org
