University of Washington Medical Center – Montlake – Radiology has an outstanding opportunity for a **RADIOLOGY TECHNOLOGIST - MRI**.

WORK SCHEDULE

- FULL-TIME (40 hours per week; 1.0 FTE; 4 x 10 hour Night shifts)
- PART-TIME (36 hours per week; 90% FTE; 3 x 12 hour Night shifts)

POSITION HIGHLIGHTS

- Under general direction from the Imaging Lead and/or Imaging Supervisor, this individual will perform and analyze comprehensive MRI examinations on patients referred for diagnosis; provide diagnostic observations to attending radiologists and determine additional examination techniques when abnormalities are present; monitor patient vital sign and condition during examinations and perform cardiopulmonary resuscitation (CPR) if necessary; review patient medical history present on exam requests and consult with physician as necessary; prepare patient for examination; counsel patient regarding safety factors and risks of examination; obtain patient release to participate in research examinations; provide localization parameters for highly complex neurosurgical procedures; coordinate the administration of sedation to patients when necessary; under the direction of a physician; administer contrast media; maintain adequate computer and/or written records using the Radiology Information System; provide instruction in the theory, techniques, applications, and analysis of diagnostic MRI procedures to physicians, post-doctoral fellows, residents, and student interns; update continuing education, teaching, and research materials; assist with the evaluation on new and prototype MRI coils and related physiological testing equipment; and review and quality control own work and the work of others.
- Competitive candidates must have knowledge of magnetic fields and patient safety requirements; exhibit clear and concise communications skills (verbal and written); and have the ability to exercise independent judgment to tailor examinations for acquisition of accurate anatomic and pathophysiologic data relative to patient's clinical presentation.

DEPARTMENT DESCRIPTION

Complete radiology and imaging services using the latest technology

Radiology Services at UWMC-Montlake is the premier choice for imaging in the Pacific Northwest. Our combination of expertise, service and commitment to providing the latest imaging technology offers comprehensive diagnostic support for the patient and their family. From basic screening tests to cutting-edge procedures, our state-of-the art equipment, skilled

technologists and diverse, world-class academic radiologists deliver timely, accurate results. All of UW Medicine's radiologists are board-certified and specialize in a variety of areas such as neuroradiology, body radiology, interventional radiology, musculoskeletal radiology, ultrasound, nuclear medicine, mammography and chest radiology. Imaging findings are integrated with all clinical data to generate comprehensive and actionable patient assessments.

PRIMARY JOB RESPONSIBILITIES

- Prepares patients for examinations, explains the procedure and answers patient's questions. Screens patients for any contraindication to MRI exam.
- Reviews patient medical history on exam request, consults physician as necessary to ensure proper exam for each patient.
- Prescribes proper scanning parameters for the most common MRI exams with the assistance of documented or computer prescribed protocols. Determines optimal imaging options for most common MRI exams to minimize artifacts and decrease scan time. Post process if needed. Calculate and administer appropriate contrast for exam.
- Administers contrast under supervision of Radiologist.
- Assures that patients are properly scheduled in Radiology Information System (RIS), and exams are completed with proper billing.
- Assures that exam is filmed, archived and sent to PACS properly.
- Monitors equipment to ensure a diagnostic exam.
- Troubleshoots and repairs basic system malfunctions.
- Practices equipment safety policies and procedures.
- Restocks rooms of all supplies as needed.
- Performs related duties as required.

REQUIRED POSITION QUALIFICATIONS

- Certified by the State of Washington as a Radiologic Technologist
- Satisfactory completion of formal technology training in an AMA approved school, registration by the American Registry of Radiologic Technologists (ARRT) OR equivalent education/experience

ABOUT UW MEDICAL CENTER-MONTLAKE

UW Medical Center is an acute care academic medical center located in Seattle with two campuses: Montlake and Northwest. As the No. 1 hospital in Seattle and Washington State since 2012 (U.S. News & World Report) and nationally ranked in seven specialties, UW Medical Center prides itself on compassionate patient care as well as its pioneering medical advances.

The UW Medical Center-Montlake campus is located on the edge of the beautiful UW campus which includes many amenities available to our staff as well as very convenient public transit options including the Sound Transit's light rail station across the street.

Excellence. Exploration. Education.
